

Summer Fruit Wine

The previous recipe can be made using any mixture of soft fruits, providing the total weight is 4 pounds/1.8 kilos. Following the method for strawberry wine, the illustrations show the processes which apply for any combination of soft fruits. You could use, for example, 2 pounds/900 grams of strawberries plus 1 pound/450 grams each of raspberries and red or white currants. If you use more than 1 pound/450 grams of currants, omit the lemon juice. Any of the raspberry-type fruits can be used. Record the quantities used for future reference.
